

# LED

## Task:

Interface 8 LEDs and shift the LED on Position from led1 to led8,each time one led will on.After completion repeat the task for num of times . The time delay between led to led is 1500ms.

## Code:

```
void setup()
{
  for (int i=2;i<=9;i++)
  {
    pinMode(i, OUTPUT);
  }
}

void loop()
{
  for (int i=2;i<=9;i++)
  {
```

```
    digitalWrite(i,1);  
    delay (1500);  
    digitalWrite(i,0);  
  }  
}
```
